

REALISTIC MAKE-BELIEVE

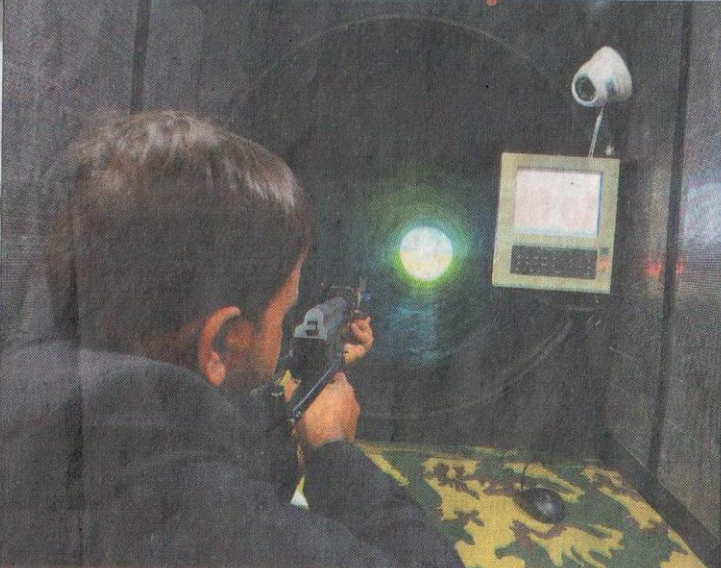

Flight simulator | Want to fly but can't earn your wings? A host of flight simulators for fighter aircraft such as the Rafale, Gripen, F-16, drones and helicopters are available. Companies are keen to give pilots and engineers an idea of how each aircraft performs

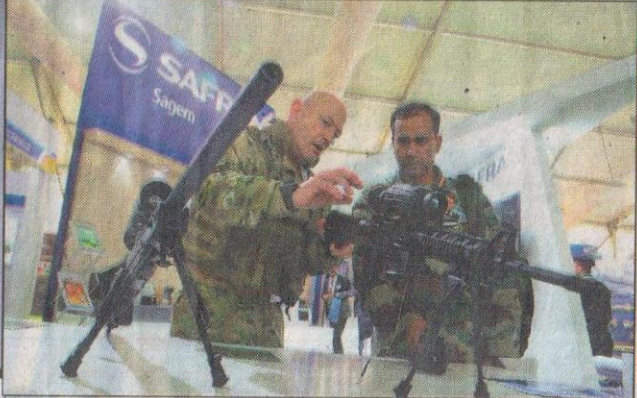

Mistral surveillance vehicle | A remote surveillance vehicle that allows the user to scan and watch a remote location. The vehicle can instantly setup a wireless network and can access all available frequencies. The vehicle has a 360-degree camera that is in use by the Bangalore Police and Mumbai Airport

Thermal imaging | Delegates can see how heat is sensed by militaries of the world to identify threats and enemy presence. The sensors and cameras pick up heat signatures and display it on a screen

Shooting Range | Ever want to know what it feels like to fire an assault rifle, launch a mortar attack in the desert or understand the life of a sniper? Several tried and tested weapons are available for delegates to try under simulated conditions

Assault Rifles | Baretta, Colt and several other companies have showcased assault rifles and handguns that participants at Defexpo can try and get a feel of

Simulator | Designed by Ari Simulation, the defence simulators can create real world visualization over several screens allowing service personnel to get familiar with equipment. It can depict water based platforms too
